This document has been prepared by the WebTrust/PKI Assurance Task Force (the “Task Force”) for use by those auditors licensed to perform WebTrust for Certification Authorities audits by CPA Canada.

Members of the Task Force are:

- Jeffrey Ward, BDO USA, LLP (Chair)
- Donald E. Sheehy (Vice-Chair)
- Chris Czajczyc, Deloitte LLP
- Reema Anand, KPMG LLP
- David Roque, Ernst & Young LLP

Significant support has been provided by:

- Daniel J. Adam, Deloitte & Touche LLP
- Donoghue Clarke, Ernst & Young LLP
- Timothy Crawford, BDO USA, LLP
- Zain Shabbir, KPMG LLP

CPA Canada Support

- Kaylynn Pippo, (Staff Contact)
- Bryan Walker
- Janet Treasure, Vice President, Member Development and Support
- Gord Beal, Vice President, Research, Guidance and Support
Reporting Guidance

Professional Standards

As of the time of publication, illustrative reports in this document have been prepared following the guidance from, and are intended to be issued under the following professional reporting standard:

- International Standard on Assurance Engagements (ISAE) 3000 Revised, Assurance Engagements Other than Audits or Reviews of Historical Financial Information

Public Disclosure of CA Business Practices

All reports issued should list the names and version numbers of all documents used by the CA to disclose its business practices, including Certificate Policies (CP) and Certification Practice Statements (CPS).

At least one type of document (CP or CPS) is required to be “publicly available” to relying parities and should be hyperlinked within the report.

For example, a CA selling and issuing certificates to the general public would fulfil the “publicly available” requirement by publishing its CP and/or CPS documents on an unprotected and conspicuous area of its website. A CA issuing certificates within a private organisation that are only intended to be used within that organisation (for example, to authenticate to company applications) would fulfil the “publicly available” requirement by publishing its CPS and/or CPS documents on an unprotected area of the organisation’s intranet that is accessible to all organisation users.

CA Processing Locations

All reports issued should list the city, state/province (if applicable), and country of all physical locations used in CA operations. This includes data centre locations (primary and alternate sites), registration authority locations (for registration authority operations performed by the CA), and all other locations where general IT and business process controls that are relevant to CA operations are performed.

List of Root and Subordinate CAs in Scope

All reports issued must list all root and subordinate CAs that were subject to audit. For attestation engagements, this list should match the list provided in management’s assertion.

The names of the CAs should be presented in a manner consistent with how these names appear in applications that use the CA’s certificate (for example, when viewing the certificate chain in a web browser). The most common method of identification would be the “Common Name (CN)” field in the “Subject” extension of each CA certificate.

For example, if the common name of the CA is “ABC Root Certification Authority – CA1”, then this is how the CA should be identified in the report. Using short-forms such as “ABC Root CA” may cause ambiguity.

The list of CAs should be presented in a clear format. It is preferred to list the CAs in a referenced appendix, although the use of a bulleted list is permissible in the audit report.
Disclosure of Changes in Scope or Roots with no Activity

During the year, various roots may be retired and may not be in use at the end of the reporting period. In addition, certain roots that are included in scope may not have issued any certificates. This information is important to users of the report and should be included. The following is an example of what could be included in the audit report.

The XY (Attachment A, CA #13), YA (Attachment A, CA #9), L1 (Attachment A, CA #10), and Y2 (Attachment A, CA #14) CAs did not issue certificates during the period 1 month 2016 to 31 month 2017 and were maintained online to provide revocation status information only. The CA certificate for the XY CA expired on 5 January 2017 and was not renewed. The CA certificate for the YA CA was revoked on 2 February 2017 and was not re-issued.

Reference to Applicable Audit Criteria

All reports issued should make reference to the applicable audit criteria used, including the version number. These criteria should be hyperlinked in the report (and management’s assertion).

Date Formats

Dates listed in the report and management’s assertion should follow a consistent format with the full name of the month spelt out (i.e. 7 May 2017, or May 7, 2017). Numerical date formats (i.e. 07/05/2017 or 05/07/2017) should be avoided.

Reporting on Subscriber Registration Activities

The auditor is required to perform testing of the relevant controls maintained at the CA level regardless of the extent of outsourcing of the over the authenticity and confidentiality of subscriber and relying party information. function. In the assertion-based engagement, the use of the statement “for the registration activities performed by ABC-CA” is designed to add clarity to the limit of the assertion.

Where External RAs are Used

External registration authorities are required to comply with the relevant provisions of the CA’s business practices disclosures, often documented in a CPS and applicable CP(s). The functions performed by these specific groups would typically be outside the scope of the WebTrust for Certification Authorities examination performed for the CA. In this case, management’s assertion should specify those aspects of the registration process that are not handled by the CA. External RAs could be examined and reported upon separately from the CA, using the relevant criteria contained in the relevant WebTrust Principles and Criteria for Certification Authorities Version being reported on. It is recommended that a separate paragraph be included in the audit report when external RAs are used:

- ABC-CA makes use of external registration authorities for specific subscriber registration activities as disclosed in ABC-CA’s business practices. Our examination did not extend to the controls exercised by these external registration authorities.
Reporting When Certain Criteria Not Applicable as Services Not Performed by CA

There will be situations where certain WebTrust criteria are not applicable as the CA does not perform the relevant CA service. A common example is not performing certificate rekey activities. In these scenarios, it is recommended that the auditor note in the audit report that the criteria were not audited as the CA does not perform such services. Wording such as the following could be used.

b. ABC-CA does not escrow its CA keys, does not provide subscriber key generation services, and does not provide certificate suspension services. Accordingly, our examination did not extend to controls that would address those criteria.

Qualified Audit Reports

Under ISAE 3000, par. 77, when the statement made by the appropriate party has identified and properly described that the subject matter information is materially misstated, the practitioner shall either:

(a) Express a qualified conclusion or adverse conclusion phrased in terms of the underlying subject matter and the applicable criteria (Sample reports 1.4 and 1.6); or

(b) If specifically required by the terms of the engagement to phrase the conclusion in terms of a statement made by the appropriate party, express an unqualified conclusion but include an Emphasis of Matter paragraph in the assurance report referring to the statement made by the appropriate party that identifies and properly describes that the subject matter information is materially misstated.

Where the auditor issues a qualified report, the Task Force recommends that option (a) be used to express the practitioner’s conclusion. The management assertion should be amended, and attached to the audit report. It reflects management’s acknowledgement of the issues causing the audit qualification. The sample reports included in this package are based on option (a). No sample reports for (b) above have been included.

International Standards – ISAE 3000

Example IN1.1 – Unqualified Opinion, Attestation Engagement, Period of Time

INDEPENDENT ASSURANCE REPORT

To the management of ABC Certification Authority, Inc. (“ABC-CA”):

Scope

We have been engaged, in a reasonable assurance engagement, to report on ABC-CA management’s assertion\(^2\) that for its Certification Authority (CA) operations at <LOCATION>\(^3\), throughout the period <DATE> to <DATE> for its CAs as enumerated in Attachment A [or list Root and Subordinate CAs in scope]\(^4\), ABC-CA has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)\(^5\)

- maintained effective controls to provide reasonable assurance that:
  - [ABC-CA’s Certification Practice Statement(s) is(are) consistent with its Certificate Policy(ies)\(^6\]
  - ABC-CA provides its services in accordance with its Certificate Policy(ies) (if applicable) and Certification Practice Statement(s)\(^7\)

- maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  - subscriber information is properly authenticated (for the registration activities performed by ABC-CA); and
  - subordinate CA certificate requests are accurate, authenticated, and approved

- maintained effective controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorized individuals;
  - the continuity of key and certificate management operations is maintained; and

\(^1\) Subheadings are optional and can be removed if desired
\(^2\) Hyperlink to assertion
\(^3\) CA processing locations as defined in the “Reporting Guidance” section
\(^4\) Reference to an appendix or replace with list of Root and Subordinate CAs in scope. Refer to “Reporting Guidance” section
\(^5\) At least one of these documents should be hyperlinked. Refer to “Reporting Guidance” section. If the CA does not have a separate CP then remove the second bullet
\(^6\) Remove bracketed text/bullet if CA has a combined CP and CPS document
\(^7\) If CA has a combined CP/CPS then remove references to Certificate Policy
CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x.

[(If external RAs are used) ABC-CA makes use of external registration authorities for specific subscriber registration activities as disclosed in ABC-CA’s business practices. Our procedures did not extend to the controls exercised by these external registration authorities.]9

[ABC-CA does not escrow its CA keys, does not provide subscriber key generation services, and does not provide certificate suspension services. Accordingly, our procedures did not extend to controls that would address those criteria.]10

**Certification authority’s responsibilities**

ABC-CA’s management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x.

**Our independence and quality control**

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Control 1, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

**Auditor’s responsibilities**

Our responsibility is to express an opinion on management’s assertion based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000, Assurance Engagements Other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management’s assertion is fairly stated, and, accordingly, included:

1. obtaining an understanding of ABC-CA’s key and certificate lifecycle management business practices and its controls over key and certificate integrity, over the authenticity and confidentiality of subscriber and relying party information, over the continuity of key and certificate lifecycle management operations and over development, maintenance and operation of systems integrity;
2. selectively testing transactions executed in accordance with disclosed key and certificate lifecycle management business practices;
3. testing and evaluating the operating effectiveness of the controls; and

---

8 Include applicable version number and hyperlink to the criteria document
9 Remove bracketed text if external RAs are not used
10 Modify this paragraph as appropriate to exclude certain criteria from scope. Please note that criteria can be excluded only if the CA does not provide the related service.
(4) performing such other procedures as we considered necessary in the circumstances.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Relative effectiveness of controls

The relative effectiveness and significance of specific controls at ABC-CA and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

Inherent limitations

Because of the nature and inherent limitations of controls, ABC-CA’s ability to meet the aforementioned criteria may be affected. For example, controls may not prevent, or detect and correct, error, fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection of any conclusions based on our findings to future periods is subject to the risk that changes may alter the validity of such conclusions.

Opinion

In our opinion, throughout the period <DATE> to <DATE>, ABC-CA management’s assertion, as referred to above, is fairly stated, in all material respects, in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x.

This report does not include any representation as to the quality of ABC-CA’s services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities v2.x, nor the suitability of any of ABC-CA’s services for any customer’s intended purpose.

Use of the WebTrust seal

[(If a seal is issued) ABC-CA’s use of the WebTrust for Certification Authorities Seal constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.]\(^\text{11}\)

INDEPENDENT ASSURANCE REPORT

To the management of ABC Certification Authority, Inc. (“ABC-CA”):

Scope

We have been engaged, in a reasonable assurance engagement, to report on ABC-CA management’s assertion that for its Certification Authority (CA) operations at <LOCATION>, as of <DATE> for its CAs as enumerated in Attachment A [or list Root and Subordinate CAs in scope], ABC-CA has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)]

- suitably designed, and placed into operation, controls to provide reasonable assurance that:
  - [ABC-CA’s Certification Practice Statement(s) is(are) consistent with its Certificate Policy(ies)]
  - ABC-CA provides its services in accordance with its Certificate Policy(ies) (if applicable) and Certification Practice Statement(s)

- suitably designed, and placed into operation, controls to provide reasonable assurance that:
  - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  - subscriber information is properly authenticated (for the registration activities performed by ABC-CA); and
  - subordinate CA certificate requests are accurate, authenticated, and approved

- suitably designed, and placed into operation, controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorized individuals;
  - the continuity of key and certificate management operations is maintained; and
  - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x.
[[If external RAs are used] ABC-CA makes use of external registration authorities for specific subscriber registration activities as disclosed in ABC-CA’s business practices. Our procedures did not extend to the controls exercised by these external registration authorities.]²⁰

[ABC-CA does not escrow its CA keys, does not provide subscriber key generation services, and does not provide certificate suspension services. Accordingly, our procedures did not extend to controls that would address those criteria.]²¹

Certification authority’s responsibilities

ABC-CA’s management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x.

Our independence and quality control

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Control 1, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Auditor’s responsibilities

Our responsibility is to express an opinion on management’s assertion based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000, Assurance Engagements Other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management’s assertion is fairly stated, and, accordingly, included:

(1) obtaining an understanding of ABC-CA’s key and certificate lifecycle management business practices and its controls over key and certificate integrity, over the authenticity and confidentiality of subscriber and relying party information, over the continuity of key and certificate lifecycle management operations and over development, maintenance and operation of systems integrity;
(2) evaluating the suitability of the design of the controls; and
(3) performing such other procedures as we considered necessary in the circumstances.

We did not perform procedures to determine the operating effectiveness of controls for any period. Accordingly, we express no opinion on the operating effectiveness of any aspects of ABC-CA’s controls, individually or in the aggregate.

²⁰ Remove bracketed text if external RAs are not used
²¹ Modify this paragraph as appropriate to exclude certain criteria from scope. Please note that criteria can be excluded only if the CA does not provide the related service.
We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**Suitability of controls**

The suitability of the design of the controls at ABC-CA and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the suitability of the design of the controls at individual subscriber and relying party locations.

**Inherent limitations**

Because of the nature and inherent limitations of controls, ABC-CA’s ability to meet the aforementioned criteria may be affected. For example, controls may not prevent, or detect and correct, error, fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection of any conclusions based on our findings to future periods is subject to the risk that changes may alter the validity of such conclusions.

**Opinion**

In our opinion, as of <DATE>, ABC-CA management’s assertion, as referred to above, is fairly stated, in all material respects, in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x.

This report does not include any representation as to the quality of ABC-CA’s services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities v2.x, nor the suitability of any of ABC-CA’s services for any customer’s intended purpose.

INDEPENDENT ASSURANCE REPORT

To the management of ABC Certification Authority, Inc. (“ABC-CA”):

Scope

We have been engaged, in a reasonable assurance engagement, to report on, for its Certification Authority (CA) operations at <LOCATION>, ABC-CA’s disclosure of its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices, [the consistency of its Certification Practice Statement with its Certificate Policy (if applicable)] and Certification Practice Statement, and the effectiveness of its controls over key and certificate integrity, over the authenticity and confidentiality of subscriber and relying party information, over the continuity of key and certificate lifecycle management operations, and over development, maintenance, and operation of CA systems integrity throughout the period <DATE> to <DATE> for its CAs as enumerated in Attachment A [or list Root and Subordinate CAs in scope].

[If external RAs are used] ABC-CA makes use of external registration authorities for specific subscriber registration activities as disclosed in ABC-CA’s business practices. Our procedures did not extend to the controls exercised by these external registration authorities.

[ABC-CA does not escrow its CA keys, does not provide subscriber key generation services, and does not provide certificate suspension services. Accordingly, our procedures did not extend to controls that would address those criteria.]

Certification authority’s responsibilities

ABC-CA’s management is responsible for its disclosures and controls, including the provision of its described services in accordance with the WebTrust Principles Criteria for Certification Authorities v2.x.

Our independence and quality control

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Control 1, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding
Auditor’s responsibilities

Our responsibility is to express an opinion on the conformity of ABC-CA management’s disclosures and controls with the WebTrust Principles and Criteria for Certification Authorities v2.x, based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000, Assurance Engagements Other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management’s disclosures and controls conform to the WebTrust Criteria, and, accordingly, included:

1. obtaining an understanding of ABC-CA’s key and certificate lifecycle management business practices and its controls over key and certificate integrity, over the authenticity and confidentiality of subscriber and relying party information, over the continuity of key and certificate lifecycle management operations and over development, maintenance and operation of systems integrity;
2. selectively testing transactions executed in accordance with disclosed key and certificate lifecycle management business practices;
3. testing and evaluating the operating effectiveness of the controls; and
4. performing such other procedures as we considered necessary in the circumstances.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Relative effectiveness of controls

The relative effectiveness and significance of specific controls at ABC-CA and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

Inherent limitations

Because of the nature and inherent limitations of controls, ABC-CA’s ability to meet the aforementioned criteria may be affected. For example, controls may not prevent, or detect and correct, error, fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection of any conclusions based on our findings to future periods is subject to the risk that changes may alter the validity of such conclusions.

Opinion

In our opinion, throughout the period <DATE> to <DATE>, ABC-CA has, in all material respects:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its:
  - [name and version of certification practice statement(s)]; and...
• maintained effective controls to provide reasonable assurance that:
  o ABC-CA’s Certification Practice Statement(s) is(are) consistent with its Certificate Policy(ies)\(^{31}\)
  o ABC-CA provides its services in accordance with its Certificate Policy(ies) (if applicable) and Certification Practice Statement(s)\(^{32}\)

• maintained effective controls to provide reasonable assurance that:
  o the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  o the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  o subscriber information is properly authenticated (for the registration activities performed by ABC-CA); and
  o subordinate CA certificate requests are accurate, authenticated, and approved

• maintained effective controls to provide reasonable assurance that:
  o logical and physical access to CA systems and data is restricted to authorized individuals;
  o the continuity of key and certificate management operations is maintained; and
  o CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x.

This report does not include any representation as to the quality of ABC-CA’s services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities v2.x, nor the suitability of any of ABC-CA’s services for any customer’s intended purpose.

Use of the WebTrust seal

INDEPENDENT ASSURANCE REPORT

To the management of ABC Certification Authority, Inc. (“ABC-CA”):

Scope

We have been engaged, in a reasonable assurance engagement, to report on ABC-CA management’s assertion\(^{35}\) that for its Certification Authority (CA) operations at <LOCATION>\(^{36}\), throughout the period <DATE> to <DATE> for its CAs as enumerated in Attachment A [or list Root and Subordinate CAs in scope]\(^{37}\), ABC-CA has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)\(^{38}\)]

- maintained effective controls to provide reasonable assurance that:
  - [ABC-CA’s Certification Practice Statement(s) is(are) consistent with its Certificate Policy(ies)\(^{39}\)]
  - ABC-CA provides its services in accordance with its Certificate Policy(ies) (if applicable) and Certification Practice Statement(s)\(^{40}\)

- maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  - subscriber information is properly authenticated (for the registration activities performed by ABC-CA); and
  - subordinate CA certificate requests are accurate, authenticated, and approved

- maintained effective controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorized individuals;
  - the continuity of key and certificate management operations is maintained; and
  - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

\(^42\) Remove bracketed text if external RAs are not used

\(^43\) Modify this paragraph as appropriate to exclude certain criteria from scope. Please note that criteria can be excluded only if the CA does not provide the related service.
We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**Relative effectiveness of controls**

The relative effectiveness and significance of specific controls at ABC-CA and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

**Inherent limitations**

Because of the nature and inherent limitations of controls, ABC-CA’s ability to meet the aforementioned criteria may be affected. For example, controls may not prevent, or detect and correct, error, fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection of any conclusions based on our findings to future periods is subject to the risk that changes may alter the validity of such conclusions.

**Basis for qualified opinion**

During our procedures, we noted that sufficient physical and environmental security controls were not implemented at ABC-CA’s data centre. Specifically:

- electronic and auditable dual-custody multi-factor entrance and exit controls to secure PKI area were not implemented;
- (other findings as applicable)

This caused WebTrust Criterion 3.4 which reads:

The CA maintains controls to provide reasonable assurance that:

- physical access to CA facilities and equipment is limited to authorized individuals, protected through restricted security perimeters, and is operated under multiple person (at least dual custody) control;
- CA facilities and equipment are protected from environmental hazards;
- loss, damage or compromise of assets and interruption to business activities are prevented; and
- compromise of information and information processing facilities is prevented.

to not be met.

During our procedures, we noted that a sufficient disaster recovery plan was not developed and tested. Additionally, physically secure disaster recovery facilities were not available. This caused WebTrust Criterion 3.8 which reads:

The CA maintains controls to provide reasonable assurance of continuity of operations in the event of a disaster. Such controls include, at a minimum:

- the development and testing of a CA business continuity plan that includes a disaster recovery process for critical components of the CA system;
- the storage of required cryptographic materials (i.e., secure cryptographic device and activation materials) at an alternate location;
• the storage of backups of systems, data and configuration information at an alternate location; and
• the availability of an alternate site, equipment and connectivity to enable recovery.

The CA maintains controls to provide reasonable assurance that potential disruptions to Subscribers and Relying Parties are minimized as a result of the cessation or degradation of the CA’s services.

to not be met.

**Qualified Opinion**

In our opinion, except for the matters described in the basis for qualified section above, throughout the period <DATE> to <DATE>, ABC-CA management’s assertion, as referred to above, is fairly stated, in all material respects, in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x.

This report does not include any representation as to the quality of ABC-CA’s services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities v2.x, nor the suitability of any of ABC-CA’s services for any customer’s intended purpose.

Report Date
INDEPENDENT ASSURANCE REPORT

To the management of ABC Certification Authority, Inc. (“ABC-CA”):

Scope

We have been engaged, in a reasonable assurance engagement, to report on, for its Certification Authority (CA) operations at <LOCATION>, ABC-CA’s disclosure of its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices, [the consistency of its Certification Practice Statement with its Certificate Policy (if applicable)], the provision of services in accordance with its [Certificate Policy (if applicable)], and Certification Practice Statement, and the effectiveness of its controls over key and certificate integrity, over the authenticity and confidentiality of subscriber and relying party information, over the continuity of key and certificate lifecycle management operations, and over development, maintenance, and operation of CA systems integrity throughout the period <DATE> to <DATE> for its CAs as enumerated in Attachment A [or list Root and Subordinate CAs in scope].

[(If external RAs are used) ABC-CA makes use of external registration authorities for specific subscriber registration activities as disclosed in ABC-CA’s business practices. Our procedures did not extend to the controls exercised by these external registration authorities.]

[ABC-CA does not escrow its CA keys, does not provide subscriber key generation services, and does not provide certificate suspension services. Accordingly, our procedures did not extend to controls that would address those criteria.] Replace with list of Root and Subordinate CAs in scope or reference to an appendix.

Certification authority’s responsibilities

ABC-CA’s management is responsible for its disclosures and controls, including the provision of its described services in accordance with the WebTrust Principles Criteria for Certification Authorities v2.x.

Our independence and quality control

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

44 Subheadings are optional and can be removed if desired
45 CA processing locations as defined in the “Reporting Guidance” section
46 Remove bracketed text if the CA publishes a combined CP/CPS
47 Remove bracketed text if the CA publishes a combined CP/CPS
48 Reference to an appendix or replace with list of Root and Subordinate CAs in scope. Refer to “Reporting Guidance” section
49 Remove bracketed text if external RAs are not used
50 Modify this paragraph as appropriate to exclude certain criteria from scope. Please note that criteria can be excluded only if the CA does not provide the related service.
51 Include applicable version number and hyperlink to the criteria document
The firm applies International Standard on Quality Control 1, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

**Auditor’s responsibilities**

Our responsibility is to express an opinion on the conformity of ABC-CA management’s disclosures and controls with the WebTrust Principles and Criteria for Certification Authorities v2.x, based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000, *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management’s disclosures and controls conform to the WebTrust Criteria, and, accordingly, included:

1. obtaining an understanding of ABC-CA’s key and certificate lifecycle management business practices and its controls over key and certificate integrity, over the authenticity and confidentiality of subscriber and relying party information, over the continuity of key and certificate lifecycle management operations and over development, maintenance and operation of systems integrity;
2. selectively testing transactions executed in accordance with disclosed key and certificate lifecycle management business practices;
3. testing and evaluating the operating effectiveness of the controls; and
4. performing such other procedures as we considered necessary in the circumstances.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**Relative effectiveness of controls**

The relative effectiveness and significance of specific controls at ABC-CA and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

**Inherent limitations**

Because of the nature and inherent limitations of controls, ABC-CA’s ability to meet the aforementioned criteria may be affected. For example, controls may not prevent, or detect and correct, error, fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection of any conclusions based on our findings to future periods is subject to the risk that changes may alter the validity of such conclusions.

**Basis for qualified opinion**

During our procedures, we noted that sufficient physical and environmental security controls were not implemented at ABC-CA’s data centre. Specifically:

- electronic and auditable dual-custody multi-factor entrance and exit controls to secure PKI area were not implemented;
- (other findings as applicable)
This caused WebTrust Criterion 3.4 which reads:

The CA maintains controls to provide reasonable assurance that:

- physical access to CA facilities and equipment is limited to authorized individuals, protected through restricted security perimeters, and is operated under multiple person (at least dual custody) control;
- CA facilities and equipment are protected from environmental hazards;
- loss, damage or compromise of assets and interruption to business activities are prevented; and
- compromise of information and information processing facilities is prevented.

to not be met.

During our procedures, we noted that a sufficient disaster recovery plan was not developed and tested. Additionally, physically secure disaster recovery facilities were not available. This caused WebTrust Criterion 3.8 which reads:

The CA maintains controls to provide reasonable assurance of continuity of operations in the event of a disaster. Such controls include, at a minimum:

- the development and testing of a CA business continuity plan that includes a disaster recovery process for critical components of the CA system;
- the storage of required cryptographic materials (i.e., secure cryptographic device and activation materials) at an alternate location;
- the storage of backups of systems, data and configuration information at an alternate location; and
- the availability of an alternate site, equipment and connectivity to enable recovery.

The CA maintains controls to provide reasonable assurance that potential disruptions to Subscribers and Relying Parties are minimized as a result of the cessation or degradation of the CA’s services.

to not be met.

Qualified Opinion

In our opinion, except for the matters described in the basis for qualified opinion section above, throughout the period <DATE> to <DATE>, ABC-CA has, in all material respects:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)]52
- maintained effective controls to provide reasonable assurance that:
  - [ABC-CA’s Certification Practice Statement(s) is(are) consistent with its Certificate Policy(ies)]53

52 At least one of these documents should be hyperlinked. Refer to “Reporting Guidance” section. If the CA does not have a separate CP then remove the second bullet
53 Remove bracketed text/bullet if CA has a combined CP and CPS document
ABC-CA provides its services in accordance with its Certificate Policy(ies) (if applicable) and Certification Practice Statement(s)\(^{54}\)

- maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  - subscriber information is properly authenticated (for the registration activities performed by ABC-CA); and
  - subordinate CA certificate requests are accurate, authenticated, and approved

- maintained effective controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorized individuals;
  - the continuity of key and certificate management operations is maintained; and
  - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x.

This report does not include any representation as to the quality of ABC-CA’s services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities v2.x, nor the suitability of any of ABC-CA’s services for any customer's intended purpose.

INDEPENDENT ASSURANCE REPORT

To the management of ABC Certification Authority, Inc. (“ABC-CA”):

Scope

We have been engaged, in a reasonable assurance engagement, to report on ABC-CA management’s assertion that, except for matters described in the assertion, for its Certification Authority (CA) operations at <LOCATION>, throughout the period <DATE> to <DATE> for its CAs as enumerated in Attachment A [or list Root and Subordinate CAs in scope], ABC-CA has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)]

- maintained effective controls to provide reasonable assurance that:
  - [ABC-CA’s Certification Practice Statement(s) is(are) consistent with its Certificate Policy(ies)]
  - ABC-CA provides its services in accordance with its Certificate Policy(ies) (if applicable) and Certification Practice Statement(s)

- maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  - subscriber information is properly authenticated (for the registration activities performed by ABC-CA); and
  - subordinate CA certificate requests are accurate, authenticated, and approved

- maintained effective controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorized individuals;
  - the continuity of key and certificate management operations is maintained; and
  - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

57 CA processing locations as defined in the “Reporting Guidance” section
58 Reference to an appendix or replace with list of Root and Subordinate CAs in scope. Refer to “Reporting Guidance” section
59 At least one of these documents should be hyperlinked. Refer to “Reporting Guidance” section. If the CA does not have a separate CP then remove the second bullet
60 Remove bracketed text/bullet if CA has a combined CP and CPS document
61 If CA has a combined CP/CPS then remove references to Certificate Policy
in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x\textsuperscript{62}.

\[(\text{If external RAs are used})\ \text{ABC-CA makes use of external registration authorities for specific subscriber registration activities as disclosed in ABC-CA’s business practices. Our procedures did not extend to the controls exercised by these external registration authorities.}]\textsuperscript{63}

\[\text{ABC-CA does not escrow its CA keys, does not provide subscriber key generation services, and does not provide certificate suspension services. Accordingly, our procedures did not extend to controls that would address those criteria.}]\textsuperscript{64}

**Certification authority’s responsibilities**

ABC-CA’s management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x.

**Our independence and quality control**

We have complied with the independence and other ethical requirements of the *Code of Ethics for Professional Accountants* issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Control 1, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

**Auditor’s responsibilities**

Our responsibility is to express an opinion on management’s assertion based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000, *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management’s assertion is fairly stated, and, accordingly, included:

\begin{enumerate}
\item obtaining an understanding of ABC-CA’s key and certificate lifecycle management business practices and its controls over key and certificate integrity, over the authenticity and confidentiality of subscriber and relying party information, over the continuity of key and certificate lifecycle management operations and over development, maintenance and operation of systems integrity;
\item selectively testing transactions executed in accordance with disclosed key and certificate lifecycle management business practices;
\item testing and evaluating the operating effectiveness of the controls; and
\item performing such other procedures as we considered necessary in the circumstances.
\end{enumerate}

\textsuperscript{62} Include applicable version number and hyperlink to the criteria document

\textsuperscript{63} Remove bracketed text if external RAs are not used

\textsuperscript{64} Modify this paragraph as appropriate to exclude certain criteria from scope. Please note that criteria can be excluded only if the CA does not provide the related service.
We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Relative effectiveness of controls

The relative effectiveness and significance of specific controls at ABC-CA and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

Inherent limitations

Because of the nature and inherent limitations of controls, ABC-CA’s ability to meet the aforementioned criteria may be affected. For example, controls may not prevent, or detect and correct, error, fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection of any conclusions based on our findings to future periods is subject to the risk that changes may alter the validity of such conclusions.

Basis for qualified opinion

During our procedures, we noted the following that caused a qualification of our opinion:

<table>
<thead>
<tr>
<th>#</th>
<th>Observation</th>
<th>Relevant WebTrust Criteria</th>
</tr>
</thead>
</table>
| 1  | We noted that electronic and auditable dual-custody multi-factor entrance and exit controls to secure PKI area were not implemented. This caused WebTrust Principles and Criteria for Certification Authorities v2.0, Criterion 3.4 to not be met. | 3.4: The CA maintains controls to provide reasonable assurance that:  
- physical access to CA facilities and equipment is limited to authorised individuals, protected through restricted security perimeters, and is operated under multiple person (at least dual custody) control;  
- CA facilities and equipment are protected from environmental hazards;  
- loss, damage or compromise of assets and interruption to business activities are prevented; and  
- compromise of information and information processing facilities is prevented |
| 2  | We noted that a sufficient disaster recovery plan was not developed and tested. Additionally, physically secure disaster recovery facilities were not available. This caused WebTrust Principles and Criteria for Certification Authorities v2.0, Criterion 3.8 to not be met. | 3.8: The CA maintains controls to provide reasonable assurance of continuity of operations in the event of a disaster. Such controls include, at a minimum:  
- the development and testing of a CA business continuity plan that includes a disaster recovery process for critical components of the CA system; |
# Observation | Relevant WebTrust Criteria
--- | ---
| | • the storage of required cryptographic materials (i.e., secure cryptographic device and activation materials) at an alternate location;  
| | • the storage of backups of systems, data and configuration information at an alternate location; and  
| | • the availability of an alternate site, equipment and connectivity to enable recovery.

The CA maintains controls to provide reasonable assurance that potential disruptions to Subscribers and Relying Parties are minimised as a result of the cessation or degradation of the CA’s services.

**Qualified Opinion**

In our opinion, except for the matters described in the basis for qualified opinion section above, throughout the period <DATE> to <DATE>, ABC-CA has, in all material respects:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)]['65

- maintained effective controls to provide reasonable assurance that:
  - [ABC-CA’s Certification Practice Statement(s) is(are) consistent with its Certificate Policy(ies)]['66
  - ABC-CA provides its services in accordance with its Certificate Policy(ies) (if applicable) and Certification Practice Statement(s) ['67

- maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  - subscriber information is properly authenticated (for the registration activities performed by ABC-CA); and
  - subordinate CA certificate requests are accurate, authenticated, and approved

- maintained effective controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorized individuals;

65 At least one of these documents should be hyperlinked. Refer to “Reporting Guidance” section. If the CA does not have a separate CP then remove the second bullet

66 Remove bracketed text/bullet if CA has a combined CP and CPS document

67 If CA has a combined CP/CPS then remove references to Certificate Policy
- the continuity of key and certificate management operations is maintained; and
- CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x.

This report does not include any representation as to the quality of ABC-CA’s services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities v2.x, nor the suitability of any of ABC-CA’s services for any customer’s intended purpose.

Management’s Assertion

Example MA1.1 – Management’s Assertion, Period of Time

ABC-CA MANAGEMENT’S ASSERTION

ABC Certification Authority, Inc. ("ABC-CA") operates the Certification Authority (CA) services known as [list of Root and Subordinate CAs in scope]68, and provides the following CA services69:

• Subscriber registration
• Certificate renewal
• Certificate rekey
• Certificate issuance
• Certificate distribution
• Certificate revocation
• Certificate suspension
• Certificate validation
• Subscriber key generation and management
• Subordinate CA [cross-]certification

The management of ABC-CA is responsible for establishing and maintaining effective controls over its CA operations, including its CA business practices disclosure on its website [or other repository location]70, CA business practices management, CA environmental controls, CA key lifecycle management controls, subscriber key lifecycle management controls, certificate lifecycle management controls, and subordinate CA certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to ABC-CA’s Certification Authority operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

ABC-CA management has assessed its disclosures of its certificate practices and controls over its CA services. Based on that assessment, in ABC-CA management’s opinion, in providing its Certification Authority (CA) services at <LOCATION>71, throughout the period <DATE> to <DATE>, ABC-CA has:

• disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its:
  o [name and version of certification practice statement(s)]; and

---

68 Reference to an appendix or replace with list of Root and Subordinate CAs in scope. Refer to “Reporting Guidance” section
69 This is a list of common services provided by CAs. Add and remove from this list to include the relevant services being provided
70 Link to business practices repository location and describe location if not website (i.e. intranet)
71 CA processing locations as defined in the “Reporting Guidance” section
• maintained effective controls to provide reasonable assurance that:
  o [ABC-CA’s Certification Practice Statement(s) is(are) consistent with its Certificate Policy(ies)]
  o ABC-CA provides its services in accordance with its Certificate Policy(ies) (if applicable) and Certification Practice Statement(s)

• maintained effective controls to provide reasonable assurance that:
  o the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  o the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  o subscriber information is properly authenticated (for the registration activities performed by ABC-CA); and
  o subordinate CA certificate requests are accurate, authenticated, and approved

• maintained effective controls to provide reasonable assurance that:
  o logical and physical access to CA systems and data is restricted to authorised individuals;
  o the continuity of key and certificate management operations is maintained; and
  o CA systems development, maintenance, and operations are properly authorised and performed to maintain CA systems integrity

in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.0, including the following:

CA Business Practices Disclosure

• Certification Practice Statement (CPS)
• Certificate Policy (CP)

CA Business Practices Management

• Certificate Policy Management
• Certification Practice Statement Management
• CP and CPS Consistency

CA Environmental Controls

• Security Management
• Asset Classification and Management
• Personnel Security

72 At least one of these documents should be hyperlinked. Refer to “Reporting Guidance” section. If the CA does not have a separate CP then remove the second bullet
73 Remove bracketed text/bullet if CA has a combined CP and CPS document
74 If CA has a combined CP/CPS then remove references to Certificate Policy
75 Include applicable version number and hyperlink to the criteria document
76 Remove bullets that are not applicable
• Physical & Environmental Security
• Operations Management
• System Access Management
• System Development and Maintenance
• Business Continuity Management
• Monitoring and Compliance
• Audit Logging

CA Key Lifecycle Management Controls
• CA Key Generation
• CA Key Storage, Backup, and Recovery
• CA Public Key Distribution
• CA Key Usage
• CA Key Archival and Destruction
• CA Key Compromise
• CA Cryptographic Hardware Lifecycle Management
• CA Key Escrow

Subscriber Key Lifecycle Management Controls
• CA-Provided Subscriber Key Generation Services
• CA-Provided Subscriber Key Storage and Recovery Services
• Integrated Circuit Card (ICC) Lifecycle Management

Example MA1.2 – Management’s Assertion, Point in Time

ABC-CA MANAGEMENT’S ASSERTION

ABC Certification Authority, Inc. ("ABC-CA") operates the Certification Authority (CA) services known as [list of Root and Subordinate CAs in scope], and provides the following CA services:

- Subscriber registration
- Certificate renewal
- Certificate rekey
- Certificate issuance
- Certificate distribution
- Certificate revocation
- Certificate suspension
- Certificate validation
- Subscriber key generation and management
- Subordinate CA [cross-]certification

The management of ABC-CA is responsible for establishing controls over its CA operations, including its CA business practices disclosure on its website [or other repository location], CA business practices management, CA environmental controls, CA key lifecycle management controls, subscriber key lifecycle management controls, certificate lifecycle management controls, and subordinate CA certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, controls placed into operation can only provide reasonable assurance with respect to ABC-CA’s Certification Authority operations.

ABC-CA management has assessed its disclosures of its certificate practices and controls over its CA services. Based on that assessment, in ABC-CA management’s opinion, in providing its Certification Authority (CA) services at <LOCATION>, as of <DATE>, ABC-CA has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)]

- suitably designed, and placed into operation, controls to provide reasonable assurance that:

Example MA1.3 – Management’s Modified Assertion, Period of Time – Accompanying Qualified Report

ABC-CERTIFICATION AUTHORITY, INC. (“ABC-CA”) operates the Certification Authority (CA) services known as [list of Root and Subordinate CAs in scope]87, and provides the following CA services88:

- Subscriber registration
- Certificate renewal
- Certificate rekey
- Certificate issuance
- Certificate distribution
- Certificate revocation
- Certificate suspension
- Certificate validation
- Subscriber key generation and management
- Subordinate CA [cross-]certification

The management of ABC-CA is responsible for establishing and maintaining effective controls over its CA operations, including its CA business practices disclosure on its website [or other repository location]89, CA business practices management, CA environmental controls, CA key lifecycle management controls, subscriber key lifecycle management controls, certificate lifecycle management controls, and subordinate CA certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to ABC-CA’s Certification Authority operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

ABC-CA management has assessed its disclosures of its certificate practices and controls over its CA services. During our assessment, we noted the following observations which caused the relevant criteria to not be met:

<table>
<thead>
<tr>
<th>Observation</th>
<th>Relevant WebTrust Criteria</th>
</tr>
</thead>
</table>
| 1 | We noted that electronic and auditable dual-custody multi-factor entrance and exit controls to secure PKI area were not implemented. | 3.4: The CA maintains controls to provide reasonable assurance that:  
- physical access to CA facilities and equipment is limited to authorised |

---

87 Reference to an appendix or replace with list of Root and Subordinate CAs in scope. Refer to “Reporting Guidance” section
88 This is a list of common services provided by CAs. Add and remove from this list to include the relevant services being provided
89 Link to business practices repository location and describe location if not website (i.e. intranet)
<table>

| This caused WebTrust Principles and Criteria for Certification Authorities v2.0, Criterion 3.4 to not be met. | individuals, protected through restricted security perimeters, and is operated under multiple person (at least dual custody) control;  
• CA facilities and equipment are protected from environmental hazards;  
• loss, damage or compromise of assets and interruption to business activities are prevented; and  
• compromise of information and information processing facilities is prevented |
| 2  
We noted that a sufficient disaster recovery plan was not developed and tested. Additionally, physically secure disaster recovery facilities were not available.  
This caused WebTrust Principles and Criteria for Certification Authorities v2.0, Criterion 3.8 to not be met. | 3.8: The CA maintains controls to provide reasonable assurance of continuity of operations in the event of a disaster. Such controls include, at a minimum:  
• the development and testing of a CA business continuity plan that includes a disaster recovery process for critical components of the CA system;  
• the storage of required cryptographic materials (i.e., secure cryptographic device and activation materials) at an alternate location;  
• the storage of backups of systems, data and configuration information at an alternate location; and  
• the availability of an alternate site, equipment and connectivity to enable recovery.  
The CA maintains controls to provide reasonable assurance that potential disruptions to Subscribers and Relying Parties are minimised as a result of the cessation or degradation of the CA’s services. |

Based on that assessment, in ABC-CA management’s opinion, except for the matters described in the preceding table, in providing its Certification Authority (CA) services at <LOCATION>90, throughout the period <DATE> to <DATE>, ABC-CA has:

---

90 CA processing locations as defined in the “Reporting Guidance” section
disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)]

maintained effective controls to provide reasonable assurance that:
  - [ABC-CA’s Certification Practice Statement(s) is(are) consistent with its Certificate Policy(ies)]
  - ABC-CA provides its services in accordance with its Certificate Policy(ies) (if applicable) and Certification Practice Statement(s)

maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
  - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
  - subscriber information is properly authenticated (for the registration activities performed by ABC-CA); and
  - subordinate CA certificate requests are accurate, authenticated, and approved

maintained effective controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorised individuals;
  - the continuity of key and certificate management operations is maintained; and
  - CA systems development, maintenance, and operations are properly authorised and performed to maintain CA systems integrity

in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.x, including the following:

CA Business Practices Disclosure

- Certification Practice Statement (CPS)
- Certificate Policy (CP)

CA Business Practices Management

- Certificate Policy Management
- Certification Practice Statement Management
- CP and CPS Consistency

CA Environmental Controls

---

91 At least one of these documents should be hyperlinked. Refer to “Reporting Guidance” section. If the CA does not have a separate CP then remove the second bullet
92 Remove bracketed text/bullet if CA has a combined CP and CPS document
93 If CA has a combined CP/CPS then remove references to Certificate Policy
94 Include applicable version number and hyperlink to the criteria document
95 Remove bullets that are not applicable
• Security Management
• Asset Classification and Management

[ABC-CA does not escrow its CA keys, does not provide subscriber key generation services, and does not provide certificate suspension services. Accordingly, our assertion does not extend to controls that would address those criteria.]  

96 Modify this paragraph as appropriate to exclude certain criteria from scope
WebTrust for Certification Authorities – SSL Baseline with Network Security

Specific Reporting Guidance for SSL Baseline with Network Security

As of the time of publication, the SSL Baseline with Network Security audit criteria incorporates two different CA/Browser Forum requirements documents:

- Baseline Requirements for the Issuance and Management of Publicly-Trusted Certificates ("SSL Baseline Requirements"); and
- Network and Certificate System Security Requirements ("Network Security Requirements")

The SSL Baseline Requirements only apply to PKI hierarchies (root and subordinate CAs) which issue publicly trusted SSL/TLS certificates intended to authenticate servers on the Internet (i.e. certificates containing the id_kp_serverAuth OID (1.3.6.1.5.5.7.3.1) in the extendedKeyUsage extension).

The Network Security Requirements apply to all CAs within a publicly trusted PKI hierarchy, even if those certificates are designed for other uses (i.e. code signing, client authentication, secure email, document signing etc.).

For example, in the following PKI hierarchy:

![PKI Hierarchy Diagram]

The SSL Baseline Requirements would only apply to Root CA, CA 1, and CA 2. However, the Network Security Requirements would apply to all CAs – Root CA, CA 1, CA 2, CA 3, and CA 4.

The illustrative report examples in this section include language to allow the auditor to explicitly define the scope of which criteria they are opining on for which specific CAs. If the SSL Baseline Requirements and Network Security Requirements apply to all in-scope CAs, then this language can be removed. Conversely, if the audit is only covering the Network Security Requirements for PKI hierarchies that do not issue SSL/TLS certificates, then language pertaining to the SSL Baseline Requirements can be removed.
INDEPENDENT ASSURANCE REPORT

To the management of ABC Certification Authority, Inc. ("ABC-CA"):  

Scope

We have been engaged, in a reasonable assurance engagement, to report on ABC-CA management’s assertion that for its Certification Authority (CA) operations at <LOCATION>, throughout the period <DATE> to <DATE> for its CAs as enumerated in Attachment A [or list Root and Subordinate CAs in scope for SSL Baseline Requirements [and Network Security Requirements]]\(^{100}\), ABC-CA has:

- disclosed its SSL certificate lifecycle management business practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)]\(^{101}\), including its commitment to provide SSL certificates in conformity with the CA/Browser Forum Requirements on the ABC-CA website, and provided such services in accordance with its disclosed practices

- maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and SSL certificates it manages is established and protected throughout their lifecycles; and
  - SSL subscriber information is properly authenticated (for the registration activities performed by ABC-CA)

- maintained effective controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorized individuals;
  - the continuity of key and certificate management operations is maintained; and
  - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity\(^{102}\)

\(^{97}\) Subheadings are optional and can be removed if desired

\(^{98}\) Hyperlink to assertion

\(^{99}\) CA processing locations as defined in the “Reporting Guidance” section

\(^{100}\) Reference to an appendix or replace with list of Root and Subordinate CAs in scope for the SSL Baseline Requirements (and Network Security Requirements. Refer to “Reporting Guidance” section

\(^{101}\) At least one of these documents should be hyperlinked. Refer to “Reporting Guidance” section. If the CA does not have a separate CP then remove the second bullet

\(^{102}\) The first 3 paragraphs pertain to the SSL Baseline Requirements and can be removed if only opining on the Network Security Requirements
And, for its CAs as enumerated in Attachment A [or list Root and Subordinate CAs in scope for Network Security Requirements]103:

- maintained effective controls to provide reasonable assurance that it meets the Network and Certificate System Security Requirements as set forth by the CA/Browser Forum

Certification authority’s responsibilities

ABC-CA’s management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with [Principle 4 of]106 the WebTrust Principles and Criteria for Certification Authorities – SSL Baseline with Network Security v2.x.

Our independence and quality control

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Control 1, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Auditor’s responsibilities

Our responsibility is to express an opinion on management’s assertion based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000, Assurance Engagements Other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management’s assertion is fairly stated, and, accordingly, included:

1. obtaining an understanding of ABC-CA’s SSL certificate lifecycle management business practices, including its relevant controls over the issuance, renewal, and revocation of SSL certificates, and]107 obtaining an understanding of ABC-CA’s network and certificate system security to meet the requirements set forth by the CA/Browser Forum;

Reference to an appendix or replace with list of Root and Subordinate CAs in scope for the Network Security Requirements, if this is different to the CAs in scope for the SSL Baseline Requirements. If the in-scope CAs are the same for both the SSL Baseline Requirements and the Network Security Requirements, then delete this line and include the full list of CAs in the first paragraph. Refer to “Reporting Guidance” section

Include this bracket if only opining on the Network Security Requirements

Include applicable version number and hyperlink to the criteria document

Include this bracket if only opining on the Network Security Requirements

Delete bracketed text if not covering the SSL Baseline Requirements
(2) [selectively testing transactions executed in accordance with disclosed SSL certificate lifecycle
management practices]108;
(3) testing and evaluating the operating effectiveness of the controls; and
(4) performing such other procedures as we considered necessary in the circumstances.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our
opinion.

Relative effectiveness of controls

The relative effectiveness and significance of specific controls at ABC-CA and their effect on assessments
of control risk for subscribers and relying parties are dependent on their interaction with the controls,
and other factors present at individual subscriber and relying party locations. We have performed no
procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

Inherent limitations

Because of the nature and inherent limitations of controls, ABC-CA’s ability to meet the aforementioned
criteria may be affected. For example, controls may not prevent, or detect and correct, error, fraud,
unauthorized access to systems and information, or failure to comply with internal and external policies
or requirements. Also, the projection of any conclusions based on our findings to future periods is subject
to the risk that changes may alter the validity of such conclusions.

Opinion

In our opinion, throughout the period <DATE> to <DATE>, ABC-CA management’s assertion, as referred to
above, is fairly stated, in all material respects, in accordance with [Principle 4 of]109 the WebTrust
Principles and Criteria for Certification Authorities – SSL Baseline with Network Security v2.x.

This report does not include any representation as to the quality of ABC-CA’s services beyond those
covered by [Principle 4 of]110 the WebTrust Principles and Criteria for Certification Authorities – SSL
Baseline with Network Security v2.x, nor the suitability of any of ABC-CA’s services for any customer’s
intended purpose.

Use of the WebTrust seal

[If a seal is issued] ABC-CA’s use of the WebTrust for Certification Authorities – SSL Baseline with
Network Security Seal constitutes a symbolic representation of the contents of this report and it is not
intended, nor should it be construed, to update this report or provide any additional assurance.]111

110 Include this bracket if only opining on the Network Security Requirements
111 Remove bracketed text if a seal is not issued. Seals will only be issued when the SSL Baseline Requirements are
covered. Reports covering only the Network Security Requirements are not eligible for a seal.
Example IN2.2 – Unqualified Opinion, Attestation Engagement, Point in Time

INDEPENDENT ASSURANCE REPORT

To the management of ABC Certification Authority, Inc. (“ABC-CA”):

Scope

We have been engaged, in a reasonable assurance engagement, to report on ABC-CA management’s assertion that for its Certification Authority (CA) operations at <LOCATION>, as of <DATE> for its CAs as enumerated in Attachment A [or list Root and Subordinate CAs in scope for SSL Baseline Requirements [and Network Security Requirements]]115, ABC-CA has:

- [disclosed its SSL certificate lifecycle management business practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)]116, including its commitment to provide SSL certificates in conformity with the CA/Browser Forum Requirement on the ABC-CA website, and provided such services in accordance with its disclosed practices

- suitably designed, and placed into operation, controls to provide reasonable assurance that:
  - the integrity of keys and SSL certificates it manages is established and protected throughout their lifecycles; and
  - SSL subscriber information is properly authenticated (for the registration activities performed by ABC-CA)

- suitably designed, and placed into operation, controls to provide reasonable assurance that:
  - logical and physical access to CA systems and data is restricted to authorized individuals;
  - the continuity of key and certificate management operations is maintained; and
  - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity]117

[And, for its CAs as enumerated in Attachment A [or list Root and Subordinate CAs in scope for Network Security Requirements]]118.

Refer to “Reporting Guidance” section
suitably designed, and placed into operation, controls to provide reasonable assurance that it meets the Network and Certificate System Security Requirements as set forth by the CA/Browser Forum in accordance with [Principle 4 of] the WebTrust Principles and Criteria for Certification Authorities – SSL Baseline with Network Security v2.x.

Certification authority’s responsibilities

ABC-CA’s management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with [Principle 4 of] the WebTrust Principles and Criteria for Certification Authorities – SSL Baseline with Network Security v2.x.

Our independence and quality control

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Control, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Auditor’s responsibilities

Our responsibility is to express an opinion on management’s assertion based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000, Assurance Engagements Other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management’s assertion is fairly stated, and, accordingly, included:

1. [obtaining an understanding of ABC-CA’s SSL certificate lifecycle management business practices, including its relevant controls over the issuance, renewal, and revocation of SSL certificates, and] obtaining an understanding of ABC-CA’s network and certificate system security to meet the requirements set forth by the CA/Browser Forum;
2. evaluating the suitability of the design of the controls; and
3. performing such other procedures as we considered necessary in the circumstances.

We did not perform procedures to determine the operating effectiveness of controls for any period. Accordingly, we express no opinion on the operating effectiveness of any aspects of ABC-CA’s controls, individually or in the aggregate.

119 Include this bracket if only opining on the Network Security Requirements
120 Include applicable version number and hyperlink to the criteria document
121 Include this bracket if only opining on the Network Security Requirements
122 Delete bracketed text if not covering the SSL Baseline Requirements
We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Suitability of controls

The suitability of the design of the controls at ABC-CA and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the suitability of the design of the controls at individual subscriber and relying party locations.

Inherent limitations

Because of the nature and inherent limitations of controls, ABC-CA’s ability to meet the aforementioned criteria may be affected. For example, controls may not prevent, or detect and correct, error, fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection of any conclusions based on our findings to future periods is subject to the risk that changes may alter the validity of such conclusions.

Opinion

In our opinion, as of <DATE>, ABC-CA management’s assertion, as referred to above, is fairly stated, in all material respects, in accordance with [Principle 4 of]\(^{123}\) the WebTrust Principles and Criteria for Certification Authorities – SSL Baseline with Network Security v2.x.

This report does not include any representation as to the quality of ABC-CA’s services beyond those covered by [Principle 4 of]\(^{124}\) the WebTrust Principles and Criteria for Certification Authorities – SSL Baseline with Network Security v2.x, nor the suitability of any of ABC-CA’s services for any customer's intended purpose.

INDEPENDENT ASSURANCE REPORT

To the management of ABC Certification Authority, Inc. (“ABC-CA”):

Scope

We have been engaged, in a reasonable assurance engagement, to report on ABC-CA management’s assertion that for its Certification Authority (CA) operations at <LOCATION>, throughout the period <DATE> to <DATE> for its CAs as enumerated in Attachment A [or list Root and Subordinate CAs in scope], ABC-CA has:

• disclosed its extended validation code signing (“EV CS”) certificate lifecycle management business practices in its:
  o [name and version of certification practice statement(s)]; and
  o [name and version of certificate policy(ies) (if applicable)] including its commitment to provide EV CS certificates in conformity with the CA/Browser Forum Guidelines on the ABC-CA website, and provided such services in accordance with its disclosed practices

• maintained effective controls to provide reasonable assurance that:
  o the integrity of keys and EV CS certificates it manages is established and protected throughout their lifecycles; and
  o EV CS subscriber information is properly authenticated (for the registration activities performed by ABC-CA)

• maintained effective controls to provide reasonable assurance that:
  o requests for EV CS Signing Authority and EV CS Timestamp Authority certificates are properly authenticated; and
  o certificates issued to EV CS Signing Authorities and EV CS Timestamp Authorities are not valid for a period longer than specified by the CA/Browser Forum

---

157 Subheadings are optional and can be removed if desired
158 Hyperlink to assertion
159 CA processing locations as defined in the “Reporting Guidance” section
160 Reference to an appendix or replace with list of Root and Subordinate CAs in scope or reference to an appendix. Refer to “Reporting Guidance” section
161 At least one of these documents should be hyperlinked. Refer to “Reporting Guidance” section. If the CA does not have a separate CP then remove the second bullet
[maintained effective controls to provide reasonable assurance that its [EV CS Signing Authority] [and EV CS Timestamp Authority] is/are operated in conformity with CA/Browser Forum Guidelines]¹⁶²

in accordance with the WebTrust Principles and Criteria for Certification Authorities – Extended Validation Code Signing v1.x¹⁶³.

Certification authority’s responsibilities

ABC-CA’s management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with the WebTrust Principles and Criteria for Certification Authorities – Extended Validation Code Signing v1.x.

Our independence and quality control

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Control ¹, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Auditor’s responsibilities

Our responsibility is to express an opinion on management’s assertion based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000, Assurance Engagements Other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management’s assertion is fairly stated, and, accordingly, included:

(1) obtaining an understanding of ABC-CA’s EV CS certificate lifecycle management business practices, including its relevant controls over the issuance, renewal, and revocation of EV CS certificates, EV CS Signing Authority certificates, and EV CS Timestamp Authority certificates;
(2) selectively testing transactions executed in accordance with disclosed EV CS certificate lifecycle management practices;
(3) testing and evaluating the operating effectiveness of the controls; and
(4) performing such other procedures as we considered necessary in the circumstances.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

¹⁶² Modify the bracketed text depending on which services the CA provides. If it does not provide a Signing Authority or Timestamp Authority, then remove this bullet point
¹⁶³ Include applicable version number and hyperlink to the criteria document
Relative effectiveness of controls

The relative effectiveness and significance of specific controls at ABC-CA and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

Inherent limitations

Because of the nature and inherent limitations of controls, ABC-CA’s ability to meet the aforementioned criteria may be affected. For example, controls may not prevent, or detect and correct, error, fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection of any conclusions based on our findings to future periods is subject to the risk that changes may alter the validity of such conclusions.

Opinion

In our opinion, throughout the period <DATE> to <DATE>, ABC-CA management’s assertion, as referred to above, is fairly stated, in all material respects, in accordance with the WebTrust Principles and Criteria for Certification Authorities – Extended Validation Code Signing v1.x.

This report does not include any representation as to the quality of ABC-CA’s services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities – Extended Validation Code Signing v1.x, nor the suitability of any of ABC-CA’s services for any customer’s intended purpose.

Use of the WebTrust seal

[If a seal is issued] ABC-CA’s use of the WebTrust for Certification Authorities – Extended Validation Code Signing Seal constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.]\(^{164}\)

Management’s Assertion

Example MA4.1 – Management’s Assertion, Period of Time

ABC-CA MANAGEMENT’S ASSERTION

ABC Certification Authority, Inc. (“ABC-CA”) operates the Certification Authority (CA) services known as [list of Root and Subordinate CAs in scope]\(^\text{180}\), and provides Extended Validation Code Signing (“EV CS”) CA services.

The management of ABC-CA is responsible for establishing and maintaining effective controls over its EV CS CA operations, including its EV CS CA business practices disclosure on its website [or other repository location]\(^\text{181}\), EV CS key lifecycle management controls, EV CS certificate lifecycle management controls, EV CS Signing Authority and EV CS Timestamp Authority certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to ABC-CA’s Certification Authority operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

ABC-CA management has assessed its disclosures of its certificate practices and controls over its EV CS CA services. Based on that assessment, in ABC-CA management’s opinion, in providing its EV CS Certification Authority (CA) services at <LOCATION>\(^\text{182}\), throughout the period <DATE> to <DATE>, ABC-CA has:

- disclosed its extended validation code signing (“EV CS”) certificate lifecycle management business practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)\(^\text{183}\)] including its commitment to provide EV CS certificates in conformity with the CA/Browser Forum Guidelines on the ABC-CA website, and provided such services in accordance with its disclosed practices

- maintained effective controls to provide reasonable assurance that:
  - the integrity of keys and EV CS certificates it manages is established and protected throughout their lifecycles; and
  - EV CS subscriber information is properly authenticated (for the registration activities performed by ABC-CA)

- maintained effective controls to provide reasonable assurance that:
  - requests for EV CS Signing Authority and EV CS Timestamp Authority certificates are properly authenticated; and

Example MA4.2 – Management’s Assertion, Point in Time

ABC-CA MANAGEMENT’S ASSERTION

ABC Certification Authority, Inc. (“ABC-CA”) operates the Certification Authority (CA) services known as [list of Root and Subordinate CAs in scope], and provides Extended Validation Code Signing (“EV CS”) CA services.

The management of ABC-CA is responsible for establishing controls over its EV CS CA operations, including its EV CS CA business practices disclosure on its website [or other repository location], EV CS key lifecycle management controls, EV CS certificate lifecycle management controls, EV CS Signing Authority and EV CS Timestamp Authority certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, controls placed into operation can only provide reasonable assurance with respect to ABC-CA’s Certification Authority operations.

ABC-CA management has assessed its disclosures of its certificate practices and controls over its EV CS CA services. Based on that assessment, in ABC-CA management’s opinion, in providing its EV CS Certification Authority (CA) services at <LOCATION>, as of <DATE>, ABC-CA has:

- disclosed its extended validation code signing (“EV CS”) certificate lifecycle management business practices in its:
  - [name and version of certification practice statement(s)]; and
  - [name and version of certificate policy(ies) (if applicable)], including its commitment to provide EV CS certificates in conformity with the CA/Browser Forum Guidelines on the ABC-CA website, and provided such services in accordance with its disclosed practices

- suitably designed, and placed into operation, controls to provide reasonable assurance that:
  - the integrity of keys and EV CS certificates it manages is established and protected throughout their lifecycles; and
  - EV CS subscriber information is properly authenticated (for the registration activities performed by ABC-CA)

- suitably designed, and placed into operation, controls to provide reasonable assurance that:
  - requests for EV CS Signing Authority and EV CS Timestamp Authority certificates are properly authenticated; and
  - certificates issued to EV CS Signing Authorities and EV CS Timestamp Authorities are not valid for a period longer than specified by the CA/Browser Forum

Example IN5.1 – Root Key Generation Ceremony, Attestation Engagement

INDEPENDENT ASSURANCE REPORT

To the management of ABC Certification Authority, Inc. ("ABC-CA"):  

Scope

192 We have been engaged, in a reasonable assurance engagement, to report on ABC-CA management’s assertion that in generating and protecting its [list of Root CAs witnessed] (collectively, “ABC-CA Root CAs”) on <DATE> at <LOCATION>, with the following identifying information:

<table>
<thead>
<tr>
<th>Root Name</th>
<th>Subject Key Identifier</th>
<th>Certificate Serial Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>ABC-CA Root CA 1</td>
<td>0a:4b:33:d1:f9:a8:9f:33:12:00:ab</td>
<td>14:2b:c7:d1</td>
</tr>
</tbody>
</table>

ABC-CA has:

- followed the CA key generation and protection requirements in its:
  - [name and version of certification practice statement]; and
  - [name and version of certificate policy (if applicable)]

- included appropriate, detailed procedures and controls in its Root Key Generation Script(s):
  - [name, version number, and date of root key generation script(s). This may also include additional scripts such as server build scripts]

- maintained effective controls to provide reasonable assurance that the ABC-CA Root CAs were generated and protected in conformity with the procedures described in its CP/CPS and its Root Key Generation Script(s)

- performed, during the root key generation process, all procedures required by the Root Key Generation Script(s)

- generated the CA keys in a physically secured environment as described in its CP/CPS

- generated the CA keys using personnel in trusted roles under multiple person control and split knowledge

---

192 Subheadings are optional and can be removed if desired
193 Hyperlink to assertion
194 Date of witnessing. This can be a range of dates if the ceremony spanned multiple days.
195 Location of the key generation ceremony
196 At least one of these documents should be hyperlinked. Refer to “Reporting Guidance” section. If the CA does not have a separate CP then remove the second bullet
• generated the CA keys within cryptographic modules meeting the applicable technical and business requirements as disclosed in its CP/CPS

in accordance with CA Key Generation Criterion 4.1 of the WebTrust Principles and Criteria for Certification Authorities v2.x\textsuperscript{197}.

**Certification authority’s responsibilities**

ABC-CA’s management is responsible for its assertion, including the fairness of its presentation, and for generating and protecting its CA keys in accordance with CA Key Generation Criterion 4.1 of the WebTrust Principles and Criteria for Certification Authorities v2.x.

**Our independence and quality control**

We have complied with the independence and other ethical requirements of the *Code of Ethics for Professional Accountants* issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Control 1, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

**Auditor’s responsibilities**

Our responsibility is to express an opinion on management’s assertion based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000, *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management’s assertion is fairly stated, and, accordingly, included:

1. obtaining an understanding of ABC-CA’s documented plan of procedures to be performed for the generation of the certification authority key pairs for the ABC-CA Root CAs;
2. reviewing the detailed CA key generation script(s) for conformance with industry standard practices;
3. testing and evaluating, during the CA key generation process, the effectiveness of controls over the integrity, confidentiality, and availability of all private keys, including back-up copies, and access keys (including physical keys, tokens, and passwords), used in the establishment of the service;
4. physical observation of all procedures performed during the root key generation process to ensure that the procedures actually performed on <DATE> were in accordance with the Root Key Generation Script(s) for the ABC-CA Root CAs; and
5. performing such other procedures as we considered necessary in the circumstances.

\textsuperscript{197} Include applicable version number and hyperlink to the criteria document
We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, throughout the period <DATE> to <DATE>, ABC-CA management’s assertion, as referred to above, is fairly stated, in all material respects, in accordance with CA Key Generation Criterion 4.1 of the WebTrust Principles and Criteria for Certification Authorities v2.x.

This report does not include any representation as to the quality of ABC-CA’s services beyond those covered by CA Key Generation Criterion 4.1 of the WebTrust Principles and Criteria for Certification Authorities v2.x, nor the suitability of any of ABC-CA’s services for any customer’s intended purpose.

Firm Name

Report Date
Management’s Assertion

Example MA5.1 – Management’s Assertion

ABC-CA MANAGEMENT’S ASSERTION

ABC Certification Authority, Inc. (‘ABC-CA’) has deployed a public key infrastructure. As part of this deployment, it was necessary to create a hierarchy consistent of self-signed Root CAs known as [list of Root CAs witnessed] (collectively, “ABC-CA Root CAs”). These CA’s will serve as Root CAs for client certificate services. In order to allow the CA’s to be installed in a final production configuration, a Root Key Generation Ceremony was conducted, the purpose of which was to formally witness and document the creation of the CA’s private signing key. This helps assure the non-refutability of the integrity of the ABC-CA Root CAs’ key pairs, and in particular, the private signing keys.

ABC-CA management has securely generated key pairs, each consisting of a public and private key, in support of its CA operations. The key pairs were generated in accordance with procedures described in ABC-CA’s Certificate Policy (CP) [and/or] Certification Practice Statement (CPS), and its Root Key Generation Script(s), which are in accordance with [based on] CA Key Generation Criterion 4.1 of the WebTrust Principles and Criteria for Certification Authorities v2.x.199

ABC-CA management established and maintained effective controls over the generation of these keys. These controls were designed to provide reasonable assurance of adherence to the above-mentioned practices throughout the root key generation process.

ABC-CA management is responsible for establishing and maintaining procedures over its CA root key generations, and over the integrity and confidentiality of all private keys and access keys (including physical keys, tokens, and passwords) used in the establishment of the ABC-CA Root CAs, and for the CA environment controls relevant to the generation and protection of its CA keys.

ABC-CA management has assessed the procedures and controls for the generation of the CA keys. Based on that assessment, in management’s opinion, in generation and protecting its CA keys for the ABC-CA Root CA’s on <DATE>200 at <LOCATION>201, with the following identifying information:

<table>
<thead>
<tr>
<th>Root Name</th>
<th>Subject Key Identifier</th>
<th>Certificate Serial Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>ABC-CA Root CA 1</td>
<td>0a:4b:33:d1:f9:a8:9f:33:12:00:ab</td>
<td>14:2b:c7:d1</td>
</tr>
</tbody>
</table>

ABC-CA has:

- followed the CA key generation and protection requirements in its:
  - [name and version of certification practice statement]; and
