

INDEPENDENT ASSURANCE REPORT

To the management of Sri Lanka CERT (Private) Limited (“Sri Lanka CERT”):

Scope

We have been engaged, in a reasonable assurance engagement, to report on Sri Lanka CERT management’s assertion that for its Certification Authority (CA) operations at Colombo, Sri Lanka, throughout the period 15 May 2025 to 31 August 2025 for its CA as enumerated in [Appendix A](#), Sri Lanka CERT has:

- disclosed its TLS certificate lifecycle management business practices in its Certification Practice Statement (CPS) as enumerated in [Appendix B](#) including its commitment to provide TLS certificates in conformity with the CA/Browser Forum Requirements on its website, and provided such services in accordance with its disclosed practices
- maintained effective controls to provide reasonable assurance that:
 - the integrity of keys and TLS certificates it manages is established and protected throughout their lifecycles;
- maintained effective controls to provide reasonable assurance that:
 - logical and physical access to CA systems and data is restricted to authorised individuals;
 - the continuity of key and certificate management operations is maintained; and
 - CA systems development, maintenance, and operations are properly authorised and performed to maintain CA systems integrity

in accordance with the [WebTrust Principles and Criteria for Certification Authorities - TLS Baseline v2.9](#).

The CA/Browser Forum Baseline Requirements for the Issuance and Management of Publicly-Trusted TLS Server Certificates require the CA to operate controls to adhere to the Network and Certificate System Security Requirements. The WebTrust Principles and Criteria for Certification Authorities - Network Security address this requirement and are reported on in a separate report.

Certification Authority’s responsibilities

Sri Lanka CERT’s management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with the WebTrust Principles and Criteria for Certification Authorities - TLS Baseline v2.9.

Our independence and quality management

We have complied with the independence and other ethical requirements of the *Code of Ethics for Professional Accountants* issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Management (ISQM) 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements* and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Practitioner's responsibilities

Our responsibility is to express an opinion on management's assertion based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000, *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management's assertion is fairly stated, and, accordingly, included:

- (1) obtaining an understanding of Sri Lanka CERT's TLS certificate lifecycle management business practices, including its relevant controls over the issuance, renewal, and revocation of TLS certificates;
- (2) selectively testing transactions executed in accordance with disclosed TLS certificate lifecycle management practices;
- (3) testing and evaluating the operating effectiveness of the controls; and
- (4) performing such other procedures as we considered necessary in the circumstances.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

The relative effectiveness and significance of specific controls at Sri Lanka CERT and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

Inherent limitations

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. For example, because of their nature, controls may not prevent, or detect unauthorised access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection to the future of any conclusions based on our findings is subject to the risk that controls may become ineffective.

Opinion

In our opinion, throughout the period 15 May 2025 to 31 August 2025, Sri Lanka CERT management's assertion, as referred to above, is fairly stated, in all material respects, in accordance with the WebTrust Principles and Criteria for Certification Authorities - TLS Baseline v2.9.

This report does not include any representation as to the quality of Sri Lanka CERT's services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities - TLS Baseline v2.9, nor the suitability of any of Sri Lanka CERT's services for any customer's intended purpose.

Use of the WebTrust seal

Sri Lanka CERT's use of the WebTrust for Certification Authorities - TLS Baseline Seal constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

Sri Lanka CERT MANAGEMENT'S ASSERTION

Sri Lanka CERT (Private) Limited ("Sri Lanka CERT") operates the Certification Authority (CA) services known as enumerated in [Appendix A](#) and provides TLS CA services.

The management of Sri Lanka CERT is responsible for establishing and maintaining effective controls over its TLS CA operations, its TLS CA business practices disclosure on its [website](#), TLS key lifecycle management controls, and TLS certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to Sri Lanka CERT's CA operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

Sri Lanka CERT management has assessed its disclosures of its certificate practices and controls over its CA services. Based on that assessment, in providing its TLS CA services at Colombo, Sri Lanka, throughout the period 15 May 2025 to 31 August 2025, Sri Lanka CERT has:

- disclosed its TLS certificate lifecycle management business practices in its Certification Practice Statement (CPS) as enumerated in [Appendix B](#), including its commitment to provide TLS certificates in conformity with the CA/Browser Forum Requirements on its website, and provided such services in accordance with its disclosed practices;
- maintained effective control to provide reasonable assurance that:
 - the integrity of keys and TLS certificates it manages is established and protected throughout their lifecycles; and
- maintained effective controls to provide reasonable assurance that:
 - logical and physical access to CA systems and data is restricted to authorised individuals;
 - the continuity of key and certificate management operations is maintained; and
 - CA systems development, maintenance, and operations are properly authorised and performed to maintain CA systems integrity
