

Report of the Independent Accountant

To the management of Sectigo Limited (“Sectigo”)

Scope

We have examined Sectigo management’s [assertion](#) that for its Certification Authority (“CA”) operations in the locations as enumerated in [Attachment B](#), for its CAs as enumerated in [Attachment C](#), Sectigo has:

- disclosed its S/MIME certificate lifecycle management business practices in the applicable versions of its Sectigo S/MIME Certificate Policy and Certification Practice Statement (“S/MIME CP/CPS”) enumerated in [Attachment A](#), including its commitment to provide S/MIME certificates in conformity with the CA/Browser Forum Requirements on the Sectigo repository, and provided such services in accordance with its disclosed practices
- maintained effective controls to provide reasonable assurance that:
 - the integrity of keys and S/MIME certificates it manages is established and protected throughout their lifecycles; and
 - S/MIME subscriber information is properly authenticated (for the registration activities performed by Sectigo)
- maintained effective controls to provide reasonable assurance that:
 - logical and physical access to CA systems and data is restricted to authorized individuals;
 - the continuity of key and certificate management operations is maintained; and
 - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

throughout the period April 1, 2025 to March 31, 2026, based on the WebTrust Principles and Criteria for Certification Authorities - S/MIME Certificates v1.0.8.

The CA/Browser Forum Baseline Requirements for the Issuance and Management of Publicly-Trusted S/MIME Certificates requires compliance with the Network and Certificate System Security Requirements (“Network Security Requirements”) as set forth by the CA/Browser Forum. The relevant principle and criteria are included as part of WebTrust Principles and Criteria for Certification Authorities - Network Security, which are reported on under separate cover.

Certification Authority’s Responsibilities

Sectigo’ management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with the [WebTrust Principles and Criteria for Certification Authorities - S/MIME Certificates v1.0.8](#).

BDO USA refers to BDO USA, P.C., a Virginia professional corporation, also doing business in certain jurisdictions with an alternative identifying abbreviation, such as Corp. or P.S.C.

BDO USA, P.C. is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms.

BDO is the brand name for the BDO network and for each of the BDO Member Firms.

Independent Accountant's Responsibilities

Our responsibility is to express an opinion on management's assertion based on our examination. Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management's assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management's assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

The relative effectiveness and significance of specific controls at Sectigo and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. Our examination did not extend to controls at individual subscriber and relying party locations and we have not evaluated the effectiveness of such controls.

Inherent Limitations

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. For example, because of their nature, controls may not prevent, or detect unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection to the future of any conclusions based on our findings is subject to the risk that controls may become ineffective.

Independent Accountant's Opinion

In our opinion management's assertion, as referred to above, is fairly stated, in all material respects.

This report does not include any representation as to the quality of Sectigo's services other than its CA operations in the locations as enumerated in [Attachment B](#), nor the suitability of any of Sectigo's services for any customer's intended purpose.

Other Matter

Without modifying our opinion, we noted the following other matters during our procedures and have considered the nature of these matters in our risk assessment and in determining the nature, timing, and extent of our procedures. This included performing procedures to understand the root cause disclosed by the CA, and if facts and circumstances noted in our examination agreed with what has been disclosed. We have also considered the procedures the CA has designed and noted if implemented properly and operated effectively, the controls would address the root cause. We did not perform any procedures subsequent to this report as to the effectiveness of the controls implemented.

Matter Topic		Matter Description
1.	Certificate Revocation	Sectigo disclosed in Mozilla Bug #1994454 that Certificate Problem Reports were not responded to within the required 24-hour timeframe.
2.	Subordinate Certificate Content	Sectigo disclosed in Mozilla Bug #2000277 that non-compliant Extant S/MIME CAs were used to issue S/MIME certificates after the permitted deadline.

While the Sectigo assertion notes all issues disclosed on Bugzilla from April 1, 2025 through the date of this report, we have only noted those instances relevant to the CAs enumerated in [Attachment C](#) and applicable to the [WebTrust Principles and Criteria for Certification Authorities - S/MIME Certificates v1.0.8](#).

Use of the WebTrust Seal

Sectigo' use of the WebTrust for Certification Authorities - S/MIME Seal constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

BDO USA, P.C.

Sectigo Limited Management's Assertion

Sectigo Limited ("Sectigo") operates the Certification Authority ("CA") services for the CAs enumerated in [Attachment C](#) in scope for S/MIME Baseline Requirements and provides S/MIME CA services.

The management of Sectigo is responsible for establishing and maintaining effective controls over its S/MIME CA operations, including its S/MIME CA business practices disclosure on its [repository](#), S/MIME key lifecycle management controls, and S/MIME certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to Sectigo's Certification Authority operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

Sectigo management has assessed its disclosures of its certificate practices and controls over its S/MIME CA services. Based on that assessment, in providing its S/MIME CA services the locations as enumerated in [Attachment B](#), Sectigo has:

- disclosed its S/MIME certificate lifecycle management business practices in the applicable versions of its Certification Practice Statement ("S/MIME CP/CPS") enumerated in [Attachment A](#), including its commitment to provide S/MIME certificates in conformity with the CA/Browser Forum Requirements on the Sectigo repository, and provided such services in accordance with its disclosed practices
- maintained effective controls to provide reasonable assurance that:
 - the integrity of keys and S/MIME certificates it manages is established and protected throughout their lifecycles; and
 - S/MIME subscriber information is properly authenticated (for the registration activities performed by Sectigo)
- maintained effective controls to provide reasonable assurance that:
 - logical and physical access to CA systems and data is restricted to authorized individuals;
 - the continuity of key and certificate management operations is maintained; and
 - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

throughout the period April 1, 2025 to March 31, 2026, based on the [WebTrust Principles and Criteria for Certification Authorities - S/MIME Certificates v1.0.8](#).

Sectigo has disclosed the following matters publicly on Mozilla’s Bugzilla platform. These matters were included below due to being open during the period April 1, 2025 through the date of this report:

Bug ID	Summary	Opened	Closed	Resolution
#1994454	Sectigo: Failure to reply to Certificate Problem Reports within 24 hours	10/15/2025	12/11/2025	Fixed
#2000277	Sectigo: Certificate issuance by non-compliant Extant S/MIME CA	11/14/2025	12/19/2025	Fixed
