

REPORT OF THE INDEPENDENT ACCOUNTANT

To the management of Viking Cloud, Inc.:

Scope

We have examined Viking Cloud, Inc., a Sysnet North America, Inc. subsidiary (“VikingCloud”), management’s [assertion](#) that for its Certification Authority (“CA”) operations in Chicago, Illinois and Dallas, Texas, in the United States of America, for its CAs as enumerated in [Attachment B](#), VikingCloud has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in the applicable versions of its VikingCloud Certificate Policy and Certification Practices Statement (“CP/CPS”) enumerated in [Attachment A](#)
- maintained effective controls to provide reasonable assurance that VikingCloud provides its services in accordance with its CP/CPS
- maintained effective controls to provide reasonable assurance that:
 - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
 - the integrity of certificates it manages is established and protected throughout their lifecycles; and
 - subscriber information is properly authenticated (for the registration activities performed by VikingCloud)
- maintained effective controls to provide reasonable assurance that:
 - logical and physical access to CA systems and data is restricted to authorized individuals;
 - the continuity of key and certificate management operations is maintained; and
 - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

throughout the period September 1, 2025 to March 6, 2026, based on the [WebTrust Principles and Criteria for Certification Authorities v2.2.2](#).

VikingCloud makes use of external registration authorities for subscriber registration activities of client authentication certificates as disclosed in VikingCloud’s business practices. Our examination did not extend to the controls exercised by these external registration authorities.

VikingCloud does not escrow its CA keys. VikingCloud does not provide subscriber key generation services, subscriber key storage and recovery services, integrated circuit card lifecycle management services, or certificate suspension services. Accordingly, our examination did not extend to controls that would address those criteria.

Certification Authority's Responsibilities

VikingCloud's management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with the [WebTrust Principles and Criteria for Certification Authorities v2.2.2](#).

Independent Accountant's Responsibilities

Our responsibility is to express an opinion on management's assertion based on our examination. Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management's assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management's assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

The relative effectiveness and significance of controls at VikingCloud and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. Our examination did not extend to controls at individual subscriber and relying party locations and we have not evaluated the effectiveness of such controls.

Inherent Limitations

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. For example, because of their nature, controls may not prevent, or detect unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection to the future of any conclusions based on our findings is subject to the risk that controls may become ineffective.

Independent Accountant's Opinion

In our opinion, management's assertion, as referred to above, is fairly stated, in all material respects.

This report does not include any representation as to the quality of VikingCloud's services other than its CA operations in Chicago, Illinois, and Dallas, Texas, in the United States of America, nor the suitability of any of VikingCloud's services for any customer's intended purpose.

Other Matters

Without modifying our opinion, we noted the following other matters during our procedures:

Matter Topic		Matter Description
1	Certificate Content	For two (2) out of two (2) client authentication certificates selected for testing, the certificates did not contain a subject alternative name extension to include the electronic mail address, per RFC 5280 requirement.
2	Subordinate Certificate Content	VikingCloud disclosed in Mozilla Bug #2012629 that certificate profile for one (1) subordinate certificate was created without the required CA/B Forum TLS OV certificate OID and was not permitted under the applicable CP/CPS at the time of issuance.

While the VikingCloud assertion notes all issues disclosed on Bugzilla from September 1, 2025 through the date of this report, we have only noted those instances relevant to the CAs enumerated in [Attachment B](#) and applicable to the [WebTrust Principles and Criteria for Certification Authorities v2.2.2](#).

On October 31, 2025, VikingCloud entered into a purchase agreement with SSL Corporation ("SSL.com") in relation to the Certification Authority line of business, pursuant to which the Root CA and Subordinate CA Key Pairs and Certificates were transferred to SSL.com on March 6, 2026.

Use of the WebTrust Seal

VikingCloud's use of the WebTrust for Certification Authorities Seal constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

BDO USA, P.C.

VIKING CLOUD, INC. MANAGEMENT'S ASSERTION

Viking Cloud, Inc., a Sysnet North America, Inc. subsidiary ("VikingCloud"), operates the Certification Authority ("CA") services for its CAs enumerated in [Attachment B](#), and provides the following CA services:

- Subscriber registration
- Certificate renewal
- Certificate rekey
- Certificate issuance
- Certificate distribution
- Certificate revocation
- Certificate validation

The management of VikingCloud is responsible for establishing and maintaining effective controls over its CA operations, including its CA business practices disclosure on its [repository](#), CA business practices management, CA environmental controls, CA key lifecycle management controls, and certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

VikingCloud makes use of external registration authorities for subscriber registration activities as disclosed in VikingCloud's business practices. Our assertion did not extend to the controls exercised by these external registration authorities.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to VikingCloud's CA operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

VikingCloud management has assessed its disclosures of its certificate practices and controls over its CA services. Based on that assessment, in VikingCloud management's opinion, in providing its CA services in Chicago, Illinois and Dallas, Texas, in the United States of America, VikingCloud has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environment control practices in its applicable versions of its VikingCloud Certificate Policy and Certification Practices Statement ("CP/CPS") enumerated in [Attachment A](#)
- maintained effective controls to provide reasonable assurance that VikingCloud provides its services in accordance with its CP/CPS
- maintained effective controls to provide reasonable assurance that:
 - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;

- the integrity of certificates it manages is established and protected throughout their lifecycles; and
 - subscriber information is properly authenticated (for the registration activities performed by VikingCloud)
- maintained effective controls to provide reasonable assurance that:
 - logical and physical access to CA systems and data is restricted to authorized individuals;
 - the continuity of key and certificate management operations is maintained; and
 - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

throughout the period September 1, 2025 to March 6, 2026, based on the [WebTrust Principles and Criteria for Certification Authorities v2.2.2](#), including the following:

CA Business Practices Disclosure

- Certification Practice Statement (CPS)
- Certificate Policy (CP)

CA Business Practices Management

- CPS Management
- CP Management

CA Environmental Controls

- Security Management
- Asset Classification and Management
- Personnel Security
- Physical and Environmental Security
- Operations Management
- System Access Management
- System Development, Maintenance, and Change Management
- Disaster Recovery, Backups, and Business Continuity Management
- Monitoring and Compliance
- Audit Logging

CA Key Lifecycle Management Controls

- CA Key Generation
- CA Key Storage, Backup, and Recovery
- CA Public Key Distribution
- CA Key Usage
- CA Key Archival
- CA Key Destruction
- CA Key Compromise

- CA Cryptographic Hardware Lifecycle Management
- CA Key Transportation
- CA Key Migration

Subscriber Key Lifecycle Management Controls

- Requirements for Subscriber Key Management

Certificate Lifecycle Management Controls

- Subscriber Registration
- Certificate Renewal
- Certificate Rekey
- Certificate Issuance
- Certificate Distribution
- Certificate Revocation
- Certificate Validation

VikingCloud does not escrow its CA keys. VikingCloud does not provide subscriber key generation services, subscriber key storage and recovery services, integrated circuit card lifecycle management services, or certificate suspension services. Accordingly, our assertion does not extend to controls that would address those criteria.

VikingCloud has disclosed the following matters publicly on Mozilla Bugzilla’s platform. These matters were included below due to being open during the period September 1, 2025 through the date of this report.

Bug ID	Summary	Opened	Closed	Resolution
1885568	VikingCloud: Delayed revocation of TLS certificates in connection to bug #1883779	3/15/2024	12/29/2025	FIXED
1902195	VikingCloud: Unplanned Access Event	6/12/2024	10/22/2025	FIXED
1992540	VikingCloud: Unplanned Access Event	10/3/2025	2/18/2026	FIXED
2012629	VikingCloud: CP/CPS and SecureTrust Root transition intermediate timing issue	1/26/2026	2/19/2026	FIXED

On October 31, 2025, VikingCloud entered into a purchase agreement with SSL Corporation (“SSL.com”) in relation to the Certification Authority line of business, pursuant to which the Root CA and Subordinate CA Key Pairs and Certificates were transferred to SSL.com on March 6, 2026.
