Report of the Independent Accountant

To the Management of SSL Corp d/b/a SSL.com ("SSL.com")

Scope

We have examined SSL.com management's assertion that for its Certification Authority ("CA") operations in Houston and Montgomery, Texas, for its CAs as enumerated in Attachment B, SSL.com has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in the applicable versions of its SSL.com Certificate Policy and Certification Practice Statement ("CP/CPS") enumerated in Attachment A
- maintained effective controls to provide reasonable assurance that it provides its services in accordance with its CP/CPS
- maintained effective controls to provide reasonable assurance that:
    - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
    - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
    - subscriber information is properly authenticated (for the registration activities performed by SSL.com); and
    - subordinate CA certificate requests are accurate, authenticated, and approved
- maintained effective controls to provide reasonable assurance that:
    - logical and physical access to CA systems and data is restricted to authorized individuals;
    - the continuity of key and certificate management operations is maintained; and
    - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

throughout the period July 1, 2025 to June 30, 2026 based on the WebTrust Principles and Criteria for Certification Authorities v2.2.2.

SSL.com makes use of delegated registration authorities for document signing certificate applications and enterprise registration authorities for S/MIME certificate applications as disclosed in SSL.com's business practices. Our examination did not extend to the controls exercised by these external registration authorities.

SSL.com does not escrow its CA keys and does not provide certificate suspension services. Accordingly, our examination did not extend to controls that would address those criteria.

BDO USA refers to BDO USA, P.C., a Virginia professional corporation, also doing business in certain jurisdictions with an alternative identifying abbreviation, such as Corp. or P.S.C.

BDO USA, P.C. is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms.

BDO is the brand name for the BDO network and for each of the BDO Member Firms.

Certification Authority's Responsibilities

SSL.com's management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with the WebTrust Principles and Criteria for Certification Authorities v2.2.2.

Independent Accountant's Responsibilities

Our responsibility is to express an opinion on management's assertion based on our examination. Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management's assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management's assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

The relative effectiveness and significance of specific controls at SSL.com and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls and other factors present at individual subscriber and relying party locations. Our examination did not extend to controls at individual subscriber and relying party locations and we have not evaluated the effectiveness of such controls.

Inherent Limitations

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. For example, because of their nature, controls may not prevent, or detect unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection to the future of any conclusions based on our findings is subject to the risk that controls may become ineffective.

Independent Accountant's Opinion

In our opinion, management's assertion, as referred to above, is fairly stated, in all material respects.

This report does not include any representation as to the quality of SSL.com's services other than its CA operations in Houston and Montgomery, Texas, nor the suitability of any of SSL.com's services for any customer's intended purpose.

Other Matter

Without modifying our opinion, we noted the following other matters during our procedures:

Matter Topic		Matter
1.	Certificate Distribution	BDO noted that Section 2.2.5 of the SSL.com CP/CPS states: "All Root and Intermediate CA Certificates utilized by the SSL.com PKI are available in the SSL.com Repository." BDO noted that the Viking Cloud Root CA Certificates acquired on March 6, 2026 were not available within the repository.
2.	Certificate Validation	SSL.com disclosed in Mozilla Bug #2029230 that for certificates issued between 9/15/2025 and 4/2/2026, an incorrect EJBCA ACME MPIC implementation allowed domain control validation to be completed without the required primary network perspective corroboration.
		SSL.com disclosed in Mozilla Bug #2071491 that MPIC DCV was not conducted on 2,700 (DV, OV and EV TLS) certificates issued through a specific DCV path.
3.	Certificate Issuance	SSL.com disclosed in Mozilla Bug #2057915 that 12 OV TLS, two (2) Code Signing, five (5) OV Client Authentication, and one (1) MC certificate were issued with invalid subject:stateOrProvinceName values.
4.		SSL.com disclosed in Mozilla Bug #2065634 that 14 OV TLS certificates were misissued with invalid combinations of countryName, stateOrProvinceName, and localityName subject attributes.

While the SSL.com assertion notes all issues disclosed on Bugzilla from July 1, 2025 through the date of this report, we have only noted those instances relevant to the CAs enumerated in Attachment B and applicable to the WebTrust Principles and Criteria for Certification Authorities v2.2.2.

Use of the WebTrust Seal

SSL.com's use of the WebTrust for Certification Authorities Seal constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

BDO USA, P.C.

SSL | Powering Trust in Business

SSL Corp d/b/a SSL.com Management's Assertion

SSL Corp d/b/a SSL.com ("SSL.com") operates the Certification Authority ("CA") services for its CAs as enumerated in Attachment B, and provides the following CA services:

- Subscriber registration
- Certificate renewal
- Certificate rekey
- Certificate issuance
- Certificate distribution
- Certificate revocation
- Certificate validation
- Subscriber key generation and management
- Subordinate CA certification and cross-certification

The management of SSL.com is responsible for establishing and maintaining effective controls over its CA operations, including its CA business practices disclosure on its repository, CA business practices management, CA environmental controls, CA key lifecycle management controls, subscriber key lifecycle management controls, certificate lifecycle management controls, and subordinate CA certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to SSL.com's CA operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

SSL.com management has assessed its disclosures of its certificate practices and controls over its CA services. Based on that assessment, in SSL.com management's opinion, in providing its CA services in Houston and Montgomery, Texas, SSL.com has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in the applicable versions of its SSL.com Certificate Policy and Certification Practice Statement ("CP/CPS") enumerated in Attachment A
- maintained effective controls to provide reasonable assurance that it provides its services in accordance with its CP/CPS
- maintained effective controls to provide reasonable assurance that:
    - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
    - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;

    - subscriber information is properly authenticated (for the registration activities performed by SSL.com); and
    - subordinate CA certificate requests are accurate, authenticated, and approved
- maintained effective controls to provide reasonable assurance that:
    - logical and physical access to CA systems and data is restricted to authorized individuals;
    - the continuity of key and certificate management operations is maintained; and
    - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

throughout the period July 1, 2025 to June 30, 2026 based on the WebTrust Principles and Criteria for Certification Authorities v2.2.2, including the following:

- CA Business Practices Disclosure
    - Certification Practice Statement (CPS)
    - Certificate Policy (CP)
- CA Business Practices Management
    - CP Management
    - CPS Management
- CA Environmental Controls
    - Security Management
    - Asset Classification and Management
    - Personnel Security
    - Physical and Environmental Security
    - Operations Management
    - System Access Management
    - System Development, Maintenance, and Change Management
    - Disaster Recovery, Backups, and Business Continuity Management
    - Monitoring and Compliance
    - Audit Logging
- CA Key Lifecycle Management Controls
    - CA Key Generation
    - CA Key Storage, Backup, and Recovery
    - CA Public Key Distribution
    - CA Key Usage
    - CA Key Archival

  - CA Key Destruction
  - CA Key Compromise
  - CA Cryptographic Hardware Lifecycle Management
  - CA Key Transportation
  - CA Key Migration
- Subscriber Key Lifecycle Management Controls
  - CA-Provided Subscriber Key Generation Services
  - CA-Provided Subscriber Key Storage and Recovery Services
  - Integrated Circuit Card (ICC) Lifecycle Management
  - Requirements for Subscriber Key Management
- Certificate Lifecycle Management Controls
  - Subscriber Registration
  - Certificate Renewal
  - Certificate Rekey
  - Certificate Issuance
  - Certificate Distribution
  - Certificate Revocation
  - Certificate Validation
- Subordinate CA and Cross Certificate Lifecycle Management Controls
  - Subordinate CA and Cross Certificate Lifecycle Management

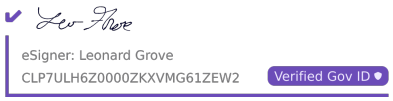

SSL.com makes use of delegated external registration authorities for Document Signing certificate applications and enterprise registration authorities for S/MIME certificate applications as disclosed in SSL.com's business practices. Our examination did not extend to the controls exercised by these external registration authorities.

SSL.com does not escrow its CA keys and does not provide certificate suspension services. Accordingly, our assertion does not extend to controls that would address those criteria.

SSL.com has disclosed the following matters publicly on Mozilla Bugzilla's platform. These matters were included below due to being open during the period July 1, 2025 through the date of this report.

Bug ID	Summary	Opened	Closed	Resolution
1927532	SSL.com: Issuance of certificates using keys previously reported as compromised	10/28/2024	8/26/2025	FIXED
1957140	SSL.com: "unknown" OCSP response for issued certificates	3/28/2025	8/11/2025	FIXED

Bug ID	Summary	Opened	Closed	Resolution
1961406	SSL.com: DCV bypass and issue fake certificates for any MX hostname	4/18/2025	7/2/2025	FIXED
1962809	SSL.com: Expired certificate for a “Valid” Test Website	4/25/2025	7/28/2025	FIXED
2029230	SSL.com: Incorrect Open MPIC Lambda implementation by EJBCA ACME Service	4/3/2026	5/28/2026	FIXED
2057915	SSL.com: Invalid Subject stateOrProvince Values	7/26/2026	-	OPEN
2057919	SSL.com: Failure to respond to Certificate Problem Report within 24 hours	7/26/2026	-	OPEN
2065634	SSL.com: Invalid combinations of countryName, stateOrProvinceName, and localityName attributes	8/21/2026	-	OPEN
2067269	SSL.com: Delayed disclosure of Timestamping CA in CCADB	8/27/2026	-	OPEN
2071491	SSL.com: MPIC not performed for specific DCV path	9/11/2026	-	OPEN

Leo Grove
