

## INDEPENDENT ASSURANCE REPORT

To the management of Asseco Data Systems S.A. (“ADS”):

### Scope

We have been engaged, in a reasonable assurance engagement, to report on *ADS - Management's Assertion 2024\_CS* that for its Certification Authority (CA) operations in Szczecin, Poland, and supporting facilities in Łódź, Poland, throughout the period February 11, 2023 to February 10, 2024 for its CAs as enumerated in Attachment A, ADS has:

- ▶ disclosed its code signing (“CS”) certificate lifecycle management business practices in its:
  - [Certification Practice Statement version 7.8](#); and
  - [Certification Policy version 5.0](#)including its commitment to provide CS certificates in conformity with the CA/Browser Forum Requirements on the ADS website, and provided such services in accordance with its disclosed practices
- ▶ maintained effective controls to provide reasonable assurance that:
  - CS subscriber information was properly collected, authenticated (for the registration activities performed by ADS) and verified;
  - The integrity of keys and CS certificates it manages is established and protected throughout their life cycles; and
- ▶ maintained effective controls to provide reasonable assurance that its CS Signing Authority and CS Timestamp Authority are operated in conformity with [CA/Browser Forum Baseline Requirements for the Issuance and Management of Publicly-Trusted Code Signing Certificates v3.7.0](#)
- ▶ maintained effective controls to provide reasonable assurance that:
  - EV CS subscriber information was properly collected, authenticated (for the registration activities performed by ADS) and verified;
  - The integrity of key and EV CS certificates it manages is established and protected throughout their life cycles.

in accordance with [WebTrust Principles and Criteria for Certification Authorities - Code Signing Baseline Requirements v3.2](#).

ADS makes use of external registration authorities for specific subscriber registration activities as disclosed in ADS’s business practices. Our examination did not extend to the controls exercised by these external registration authorities.

### Certification authority’s responsibilities

ADS’s management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services, based on the WebTrust Principles and Criteria for Certification Authorities - Code Signing Baseline Requirements v3.2.

## Our independence and quality management

We have complied with the independence and other ethical requirements of the *Code of Ethics for Professional Accountants* issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies International Standard on Quality Management (ISQM) 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements* which requires the firm to design, implement and operate a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

## Practitioner's responsibilities

Our responsibility is to express an opinion on management's assertion based on our procedures. We conducted our procedures in accordance with International Standard on Assurance Engagements 3000 (Revised), *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*, issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, management's assertion is fairly stated, and, accordingly, included:

- 1) obtaining an understanding of ADS's CS and EVCS certificate lifecycle management business practices, including its relevant controls over the issuance, renewal, and revocation of CS and EVCS certificates, CS and EV CS Signing Authority certificates, and CS and EVCS Timestamp Authority certificates;
- 2) selectively testing transactions executed in accordance with disclosed CS and EVCS certificate lifecycle management practices;
- 3) testing and evaluating the operating effectiveness of the controls; and
- 4) performing such other procedures as we considered necessary in the circumstances.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

The relative effectiveness and significance of specific controls at ADS and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

## Inherent limitations

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. For example, because of their nature, controls may not prevent, or detect unauthorised access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection to the future of any conclusions based on our findings is subject to the risk that controls may become ineffective.

## Opinion

In our opinion, throughout the period from February 11, 2023 to February 10, 2024, ADS management's assertion, as referred to above, is fairly stated, in all material respects, in accordance with the WebTrust Principles and Criteria for Certification Authorities - Code Signing Baseline Requirements v3.2.

This report does not include any representation as to the quality of ADS's services beyond those covered by the WebTrust Principles and Criteria for Certification Authorities - Code Signing Baseline Requirements v3.2, nor the suitability of any of ADS's services for any customer's intended purpose.

## Use of the WebTrust seal

ADS's use of the WebTrust for Certification Authorities - Code Signing Baseline Requirements Seal constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

## ASSECO DATA SYSTEMS S.A. MANAGEMENT'S ASSERTION

Asseco Data Systems S.A. ("ADS") operates the Certification Authority (CA) services as enumerated in **Attachment A**, and provides code signing ("CS") CA services.

The management of ADS is responsible for establishing and maintaining effective controls over its code signing services, including its code signing business practices disclosure on its website <https://www.certum.pl/pl/repozytorium/>, code signing key lifecycle management controls, and certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to ADS's Certification Authority operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

ADS management has assessed its disclosures of its certificate practices and controls over its CS CA services. Based on that assessment, in ADS management's opinion, in providing its CS CA services in Szczecin, Poland, and supporting facilities in Łódź, Poland, throughout the period February 11, 2023 to February 10, 2024, ADS has:

- disclosed its Code Signing ("CS") certificate lifecycle management business practices in its:
  - [Certification Practice Statement version 7.8](#); and
  - [Certification Policy version 5.0](#)including its commitment to provide CS certificates in conformity with the CA/Browser Forum Guidelines on the ADS website, and provided such services in accordance with its disclosed practices
- maintained effective controls to provide reasonable assurance that:
  - CS subscriber information was properly collected, authenticated (for the registration activities performed by ADS) and verified;
  - The integrity of keys and CS certificates it manages is established and protected throughout their life cycles.
- maintained effective controls to provide reasonable assurance that its CS Signing Authority and CS Timestamp Authority are operated in conformity with [CA/Browser Forum Baseline Requirements for the Issuance and Management of Publicly-Trusted Code Signing Certificates v3.7.0](#)
- maintained effective controls to provide reasonable assurance that:
  - EV CS subscriber information was properly collected, authenticated (for the registration activities performed by ADS) and verified;
  - The integrity of keys and EV CS certificates it manages is established and protected throughout their life cycle

in accordance with the [WebTrust Principles and Criteria for Certification Authorities – Code Signing Baseline Requirements v3.2](#).
